

February

February is named for the Latin term februum, which refers to purification. Historically, mid-February was the time for Februa, a Roman purification ritual very similar to today's practice of spring cleaning. February is a special month. It's the shortest of all the months in the calendar, and features an extra day (February 29th) every four years (known as the leap year). Much like January, which was added later than the other months to the Roman calendar.

Until the concept of a leap year was established, the number of days in February was subject to change every year. Talk about confusing! February's birthstone is the Amethyst!

Winter Weather

With the weather getting colder, there will be a chance of snow and ice. It is important all persons adhere to common sense protocols and accept they have a responsibility for personal safety by following simple rules:

Snow and ice present health and safety risks, as the potential for slips, trips and falls increases significantly.

Walk, don't run.

Wear appropriate footwear with a non-slip sole.

Try where possible to keep your hands free of objects in order to aid balance and minimise the effects of a slip, trip or fall.

Allow more time for your journey.

Be mindful of slipping while walking, particularly when using ramps and steps.

If driving be mindful of skidding when leaving car parks as they may not have been gritted.
